

REAL CONSULTING SERVICES COMPANY FACT SHEET

RCS Introduction

RCS provide a broad range of business and technology services to any size of organisation primarily in the financial services and technology sectors but we also work successfully with clients in other sectors. We connect with and pro-actively contribute to deliver results in partnership with the end user, the technology and service providers and the **RCS** staff, associates and partners.

RCS have gone from strength to strength by operating under a straight forward business model of maximizing our key strength of our extended global network of experts in their field.

We have significant experience of working successfully in Europe, the Middle East, Asia, and US markets with extensive knowledge of, and strong connections, in emerging markets.

RCS Services

RCS provide the following services globally to organisations of any size:

- Services – Financial Sector:
 - A global network of highly skilled experts in delivering financial services projects with particular experience in:
 - Core banking
 - Customer Data Management (CDM) and Integration (CDI)
 - Delivery channels
 - Payment systems including Faster Payments

- Programme, Project & Project Office Management
 - Regulatory & Compliance
 - Risk Management
 - Treasury
 - Complex IT Integration and Migration Projects
